Wednesday, June 23, 2010

### **Toronto, ON – UltraFit Exhaust Systems launches their complete line catalogue, on-line.**

North American exhaust warehouse distributors, automotive aftermarket jobbers and installers can now look-up UltraFit's full line of; direct fit catalytic converters, exhaust pipes, mufflers, front pipes, front repair pipes and universal products, on- line at [www.ultrafitmanufacturing.com](http://www.ultrafitmanufacturing.com)

The e-catalogue provides easy look-up for over 2500 UltraFit products, or 85% of the exhaust system requirements. These parts can be searched by part number, interchange number, keywords, description, or vehicle attribute.

"The comprehensive on-line catalogue is another step in UltraFit's response to a growing shift away from the traditional paper catalogue," says Guy Trottier, UltraFit's Product Manager, "the e-catalogue also contains a brief description of part attributes, interchange information, as well as photos for reference and buyers guide details."

The e-catalogue is updated daily as new parts are added. On average there are over 300 new exhaust parts per year.

UltraFit Exhaust Systems is a business unit of UltraFit Manufacturing, a diversified, contract manufacturer of tubular metal components.
